evogenic ERP is a cost effective, user-friendly business software application designed specifically for small and medium sized businesses. This comprehensive package covers all core operations giving you a fully integrated up to date view of your business critical information, when you need it, enabling you to confidently make informed business decisions.

With evogenic ERP you have no reliance on other business application software; all your processes are managed from one easy to use and intuitive package. You get greater visibility and control, as all your business critical information is managed in one central database.

As your business grows evogenic ERP will grow and adapt with you as your business needs change. Allowing you to streamline your processes and improve efficiencies and effectiveness of your employees.

“So impressed with evogenic ERP that we use it in all five of our companies”

of our companies”

evogenic ERP helps you manage your business functions across sales, purchasing, stock, distribution, and financials, all in a single integrated system. With evogenic ERP, you can instantly access a complete and real-time view of your business, so you can respond to customers faster and grow your business more profitable.

By use of evogenic ERP document attachments, archiving and emailing costly pre-printed stationary and time consuming filing can be eliminated. Being able to access these documents within seconds your productivity will immediately be improved.

With evogenic ERP alerts you are able to proactively manage your business, enabling your business to run more efficiently and increase. Alerts are totally configurable instantly notifying you of any situation that may need addressing before it happens before it becomes a disruption to your business.

A rental model with low monthly fees and fast implementation ensures an almost instant return on investment. By design, low levels of training are required allowing employees to immediately become productive within their roles.

evogenic ERP is fully configurable to meet the individual needs of your business and employees. Access is controlled by the Console giving a single customisable entry point to the system, with the side bar common operations are immediately available without having to negotiate the menu structure.

Each screen can be customised to the individuals requirements, enabling the the information be presented in a convenient way. Extensive use of filters ensures that only the information relevant is displayed allowing you to quickly ascertain the details you need. All customisation changes and filters can be easily saved allowing you to quickly switch the way information is presented in a manor that is relevant to the operation in hand.
